Automated Feedback Analysis Workflow

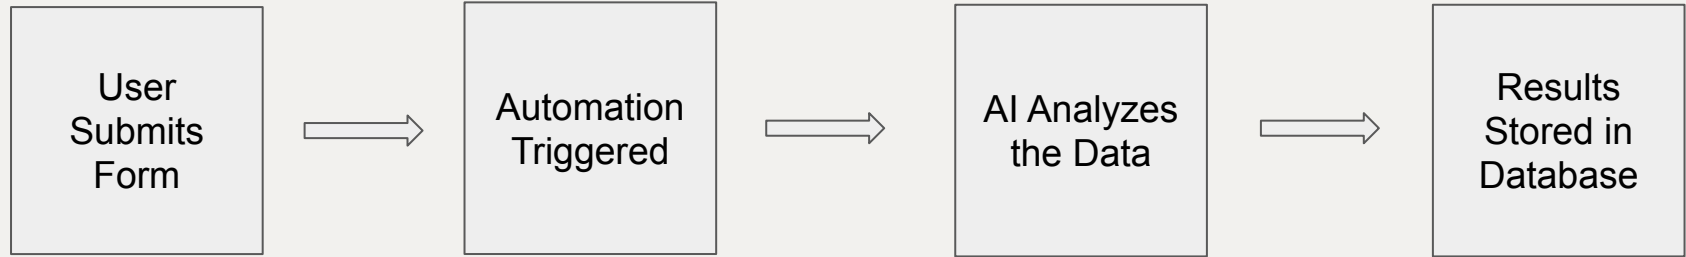

Valrie Morrison

Introduction

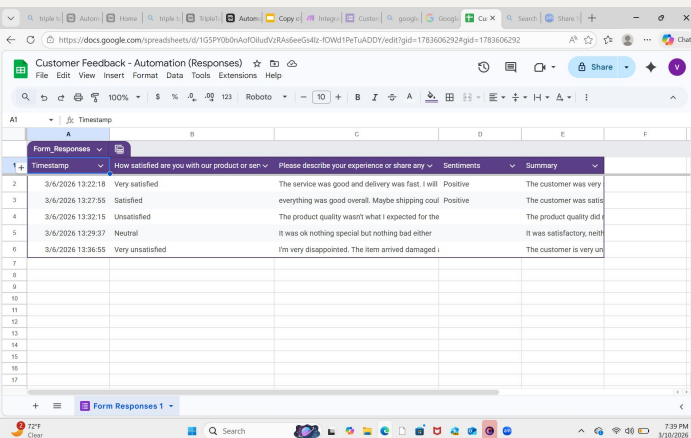

This project demonstrates automated feedback analysis. Google Forms collects customer responses, Make processes the data through an AI analysis step, and the results are stored in google sheets for review.

Workflow diagram

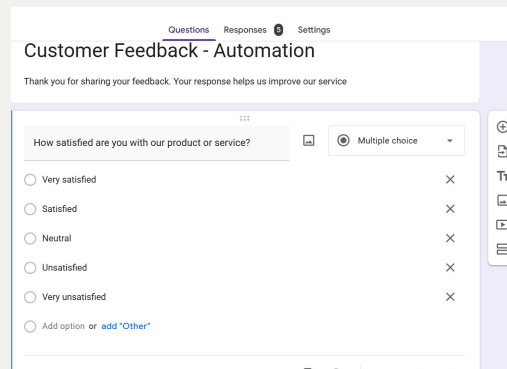

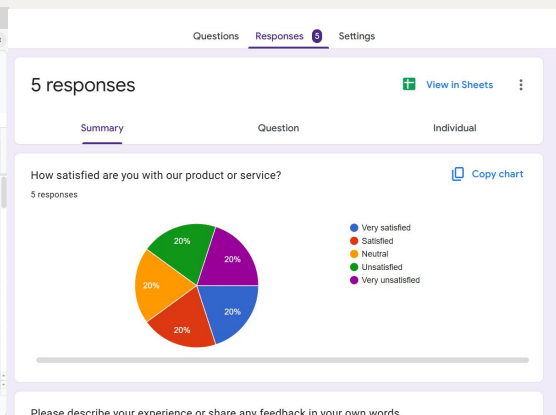

Workflow in action

The screenshot shows a Google Sheet with the following data:

Timestamp	How satisfied are you with our product or service?	Please describe your experience or share any feedback	Sentiments	Summary
3/6/2026 13:22:18	Very satisfied	The service was good and delivery was fast. I will	Positive	The customer was very
3/6/2026 13:27:55	Satisfied	everything was good overall. Maybe shipping coul	Positive	The customer was satis
3/6/2026 13:32:15	Unsatisfied	The product quality wasn't what I expected for the		The product quality did
3/6/2026 13:29:37	Neutral	It was ok nothing special but nothing bad either		It was satisfactory, neith
3/6/2026 13:36:55	Very unsatisfied	I'm very disappointed. The item arrived damaged i		The customer is very un

The screenshot shows the 'Questions' tab for the form 'Customer Feedback - Automation'. It displays the question 'How satisfied are you with our product or service?' with a multiple choice response type. The options are:

- Very satisfied
- Satisfied
- Neutral
- Unsatisfied
- Very unsatisfied
- Add option or add "Other"

Results

Example results from your test data

The customer was very satisfied with the good service and fast delivery, and intends to order again.

Sentiment: Positive

Sentiment breakdown

Positive
Neutral
Negative

sample summaries

The customer was very satisfied with the good service and fast delivery, and plans to order again.

The customer was satisfied overall but suggested that shipping could be faster.

AI Prompt

Return your answer in the following exact structure: the only valid values are exactly

```
{ "sentiment": [Positive,Neutral,Negative] "summary": "[Your summary here]" }
```

Challenges & improvements

The automation worked well in capturing and analyzing feedback. One challenge was refining the AI outputs and integrating the tools smoothly. With more time, i would improve the prompts and add visual dashboards to make the insights even clearer.
